

Task 2

Group : 6

Description:

The main idea of the task is to use high programming language in 8051 MCU.

The aim is to operate 7 Segment with specific delay 100 Ms and when we trigger it, it will be delayed with 50 Ms and when you press on the button again it will be delayed with 150.

It also has another push button when pressed it turns on 4 LEDs for 3 sec and count backwards.
